MOHAMMED AHMED ALFAIFI

Software Engineer | AI & Automation

I build AI-powered applications, workflow automation and governed digital platforms: LLM/RAG chatbots, reporting and audit platforms, data dashboards, and full-stack products shipped to real users.

PROJECTS

PROFESSIONAL WORK · GENERAL DIRECTORATE OF PRISONS

LLM · RAG · INTERNAL CHATBOT

Fateen

A secure internal chatbot powered by Large Language Models and Retrieval-Augmented Generation, giving context-aware answers grounded in approved organizational knowledge sources.

LLM | RAG | Python | FastAPI

GOVERNANCE · DASHBOARDS

Governed Reporting Platform

Centralized report management with role-based access control, report approval workflows and interactive dashboards.

RBAC | Workflows | Dashboards | PostgreSQL

WORKFLOW AUTOMATION

Internal Audit Automation Platform

Automates internal audit processes end to end: audit workflows, follow-up activities and report preparation.

Automation | Python | Reporting

DATA · POWER BI

Automated Operational Reports

Python and Power BI pipelines that automate operational and administrative reports, including release and recidivism performance indicators.

Power BI | Pandas | Python

COMPUTER VISION · HR

Facial-Recognition Attendance System

Camera-based employee attendance that reduced check-in time by 60%, with employee management, attendance logs and statistics.

OpenCV | Flask | SQLite | Docker

Code on GitHub ↗

CHATBOT · HR

HR Chatbot

Automates answers to frequently asked employee questions, reducing manual support workload.

NLP | Python

PRODUCTS & PERSONAL PROJECTS

Live · pilot in Riyadh

Hawlak — neighbourhood ordering platform

A multi-store ordering platform for local shops that deliver with their own couriers. Each store opens its shop in minutes; customers order from every shop in their neighbourhood in one flow.

- Four connected interfaces: customer, store owner, courier and platform admin.
- Online payments settled directly to each store, internal wallet, subscriptions, offers, campaigns and e-invoicing.
- Fully bilingual (Arabic / English) with QR posters branded per store.

Web app · Payment gateway · Maps / GPS · Push notifications · E-invoicing

Visit the platform ↗

Live · closed pilot

Mishwar — daily ride subscriptions

Daily transport for students and employees with a fixed driver and schedule. Parents subscribe for their children and track the car live; drivers run their day from an app; the transport partner operates everything from one dashboard.

- Rider and driver apps, operations dashboard and public join page.
- Auto-generated trips, live tracking, delay alerts and an emergency button.
- Subscriptions, tax invoices with QR, discount codes, ratings and reports; CI with 145 tests.

NestJS · TypeScript · PostgreSQL · PostGIS · Redis · Next.js · Flutter · Docker

Platform page ↗ Rider web app ↗ Code on GitHub ↗

SPEECH AI · OFFLINE

Local Real-Time Translation System

Offline, on-device real-time speech translation across 8 languages with a text archive, tested on Windows and iPhone.

Speech-to-text · Machine translation · Python

SIMULATION · REAL-TIME

Smart Drone Simulator

3D flight simulation in Godot controlled by a FastAPI server over WebSocket; any external system can send commands that reach the drone instantly.

Godot · FastAPI · WebSocket · Python

Code on GitHub ↗

AI CHATBOT · HEALTHCARE

MedicalBot

An AI chatbot that answers medical and health information questions.

LLM · Python

In development

Building & Owners-Association Management

A platform for building-management companies: scheduled maintenance with photo proof, resident requests and transparent finances for every owner.

SaaS · Operations

EXPERIENCE

Nov 2024 – Present

Operational Contract Software Engineer

General Directorate of Prisons · Riyadh, Saudi Arabia

- Developed Fateen, a secure LLM/RAG chatbot grounded in approved organizational knowledge.
- Built a governed reporting platform with RBAC, approval workflows and interactive dashboards.
- Developed a platform that automates internal audit workflows, follow-ups and reporting.
- Automated operational reports with Python and Power BI, including release and recidivism KPIs.
- Improved software services and UX through requirements analysis, testing and stakeholder feedback.

Sep 2023 – Mar 2024

AI and Software Development Trainee — Tamheer Program

General Directorate of Prisons

- Developed Python applications and AI solutions for internal business needs.
- Built a facial-recognition attendance system that cut check-in time by 60%.
- Developed an HR chatbot that reduced manual support workload.

SKILLS

AI & ML
LLM applications, RAG, Transformers, PyTorch, TensorFlow, OpenCV

BACKEND
Python, FastAPI, Flask, NestJS, REST APIs, WebSocket

FRONTEND & DATA
React, TypeScript, JavaScript, Next.js, Power BI, Pandas, NumPy

DATABASES & OPS
PostgreSQL, MySQL, SQLite, Docker, Git, software testing, UX

EDUCATION

B.Sc. in Computer Science
Jazan University · 2023

COURSES

- AI and Machine Learning for Security Agencies — Naif Arab University for Security Sciences, 2025
- CCNA Networking — Tuwaiq Academy, 2024
- Statistical Reporting and Data Visualization Using Power BI, 2026

Let's work together

Arabic (native) · English (professional working proficiency) · Based in Riyadh
